

# NOMAD

Simply the best

The TDS Nomad has everything wanted in an outdoor rugged handheld. In addition to integrated Bluetooth, GPS, WLAN and GPRS/Edge, the Nomad is available with built-in digital camera and bar code scanner. Featuring superior processing speed and plenty of SDRAM and Flash Memory it is perfect for all mobile applications including detailed graphics, navigation or heavy calculation software.

As a true outdoor rugged handheld, the Nomad meets the rigorous MIL-STD-810F military standard for drops, vibration, humidity, altitude and extreme temperatures. Nomad is IP67 rated, which means that it is completely sealed against dust and water.

Nomad comes with a powerful 806 MHz Marvell PXA320 XScale processor, 128 MB DDR SDRAM, a choice of 512 MB, 1 GB or 2 GB of Flash memory. It has a hot-swappable Lithium Ion battery that can work all day without a recharge. A full VGA display and touchscreen offers sharp, high-resolution graphics even in bright sunlight, making it ideal for any graphic intense application. The numeric keypad has backlight for night use or dark environments. The Nomad also includes the latest Windows Mobile 6 software, so it runs all the applications you use most, including a wide range of third-party software for industry-specific applications.

The Nomad makes it easy to collect, save and transmit data in the field because it is available with so many built in capabilities and options. An integrated GPS receiver gives you the right location data for navigation applications. With the built-in laser scanner you can instantly collect data from 1D bar codes and an integrated 2-megapixel digital camera captures color images for inspections, maintenance, and repair applications. Plus, you can use the Nomad's CompactFlash (CF) and Secure Digital (SDIO) slots to add even more devices.

<b>Size</b>	176mm x 100mm x 50mm
<b>Weight</b>	596 g
<b>Environment</b>	<i>Operating:</i> -30°C to +60°C <i>Storage:</i> -40°C to +70°C <i>Drop:</i> MIL-STD-810F, Method 516.5, Procedure IV 26 drops from 1.22 m 6 additional drops at -30°C, 6 additional drops at 60°C <i>Sand &amp; Dust:</i> IP67, MIL-STD-810F, Method 510.3, Procedures I&II <i>Water:</i> IP67, Sealed against accidental immersion (1m for 30min) MIL-STD-810F, Method 512.4, Procedure I <i>Humidity:</i> MIL-STD-810F, Method 507.4 <i>Altitude:</i> 15.000 ft (4572m) at +23°C, MIL-STD-810F, Method 500.4, Procedures I, II and III <i>Vibration:</i> MIL-STD-810F, Method 514.5 Procedures I&II
